

IMDb Hater's Heuristic Evaluation Form

Evaluator Name: Ryan Nguyen

Date of Evaluation: 12/10

Application Evaluated: IMDb Hater's Final Prototype

Screen Evaluated: User Reviews Page

Nielsen's Heuristics Violated:

Heuristic	Violation Rating (0 - 4) 4 is a heavy violation 0 is no violation	Issue Description
Visibility of System Status	0	User gets immediate feedback on the different actions they take
Match Between System and Real World	0	User sees familiar symbols and words
User control and freedom	2	When fully implemented all the features will need ways to gracefully cancel actions
Error Prevention	2	The user should be asked for confirmation before their list is edited
Consistency and Standards	1	The list sorting symbols should be removed or improved to provide more clarity about their function
Recognition vs Recall	1	Some symbols are easy to recognize like the share arrow but removing a movie from a list by clicking on the check mark might not be so easy to remember
Flexibility and Efficiency of Use	2	There aren't any shortcuts to allow experienced users to speed up the process
Aesthetic and Minimalist Design	0	The movies are presented well with key information available

Help Users Recognize, Diagnose, and Recover from Errors	2	No error messages exist
Help and Documentation	3	Should make a documentation page to help users understand ambiguous symbols

Optional Comments:
