Evaluator Name: Ryan Nguyen
Date of Evaluation: 12/10
Application Evaluated: IMDb Hater's Final Prototype

Screen Evaluated: Home Screen
Nielsen's Heuristics Violated:

Heuristic	Violation Rating (0 - 4) 4 is a heavy violation 0 is no violation	Issue Description
Visibility of System Status	0	none
Match Between System and Real World	0	none
User control and freedom	2	Since this is a minimum viable product the user may expect to be able to interact with things that the designers have not implemented
Error Prevention	3	No error prevention implemented if a user accidentally clicks something that they did not want to they will need to navigate back to where they were before the error
Consistency and Standards	0	Consistent navigation bar that has two defined actions the user can take
Recognition vs Recall	0	Common symbols are used throughout the page to easily allow users to know what things are without needing explanation
Flexibility and Efficiency of Use	2	Not a flexible product there are set actions that can be accomplished
Aesthetic and Minimalist Design	1	Some presentation improvements can be made

		such as text spacing
Help Users Recognize, Diagnose, and Recover from Errors	3	No error handling
Help and Documentation	2	A new user to Figma will have to experiment with what they can click on. Until they realize what they are allowed to click on

Optional Comments:
